

Highly compact square briquettes

Briquetting press RB 400 RS

economical - robust - powerful

The briquetting press RB 400 RS – reliable and efficient briquetting technology for the industrial production of square briquettes for volume reduction or energy recovery. The very high packing density of the square briquettes is perfect for

the storage or transport. Moreover, the high-density briquettes have a very good burning behavior. Let us help you find the best way to briquette your material.

Option:
stable base frame
and hopper

The RB 400 RS for the powerful briquetting of various materials

Hydraulic power unit with axial piston pump and cooling for multi-shift operation

Control panel for control and programming of the briquetting press with touch screen

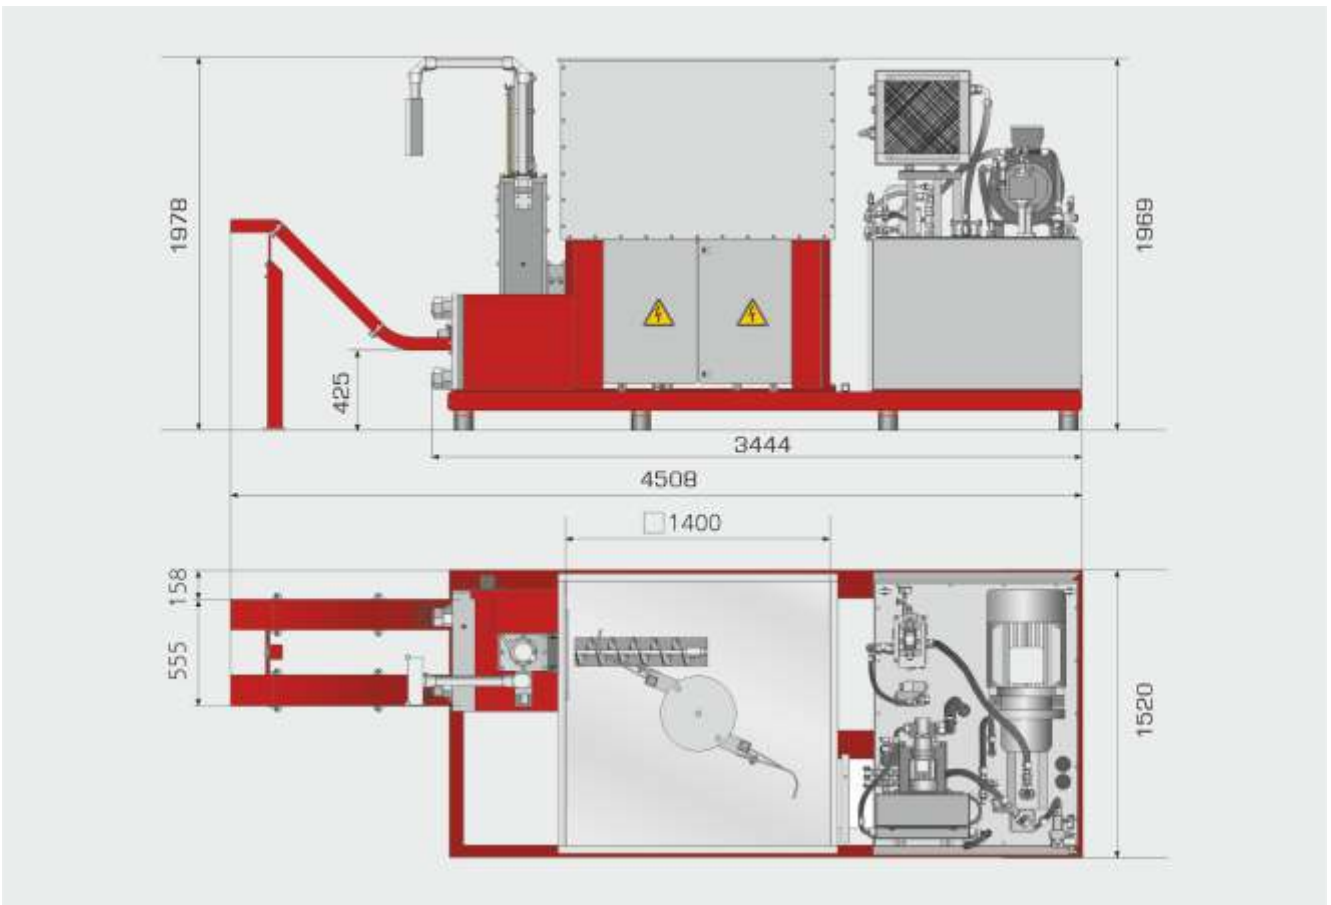

Position sensor for controlling the operations of the cylinder and the form. In addition, the central lubrication system

Powerful hydraulic cylinders, gear motors for the agitator and screw conveyor

The RB 400 RS in operation in the production of square briquettes

Typ	RB 400 RS	
Briquette-Dimensions (approx. mm)		150 x 60
Throughput (to approx. kg/h)		400
Hydraulic motor (kW)		30
Worm motor (kW)		0,6
Permanent agitator (kW)		2,2
Oil quantity (Ltr)		800
Weight (approx. kg)		4.500

All models are fitted with safety switches for oil temperature, oil cooling and SPS for fully automatic operation. The throughput rate depends on materials being processed. Demonstrations and tests are possible in our technical laboratory by prior agreement.

Machines from the Reinbold product line:

Series AZR 50 Primus:
the starter model of the single-shaft shredders with drawer feed

Series AZR 600 - AZR 800 S:
the universal single shaft shredder for woodworking shops

Series AZR 800 - AZR 2000 S Gigant:
the single shaft shredder for professional compaction of recyclables

Series RLZ 400 - RHZ 1300 S:
the horizontal shredder with horizontal material feed

Series AZR 600 K - 2000 S K Gigant:
the single shaft shredder for effective plastics shredding

Series RMZ 500 - RMZ 1000 S:
The four-shaft shredder that is ideal for shredding long stock

Drawing on its many years of experience, Reinbold, with its broad range of machines, is able to offer ideal solutions for different applications in material shredding and briquetting. Our testing facility is available to perform tests on your material.
